= your professional
growth and success.

Kansas NEA & Missouri NEA Collaborate to Offer **Micro-Credential** Professional Learning Opportunities!

A micro-credential is a short, competency-based recognition that allows an educator to demonstrate mastery in a particular area.

NEA members are invited to participate in a virtual Professional Learning Community (PLC) to support your successful completion of an NEA micro-credential. During this self-directed project-based professional development, you will collect evidence of proficiency in a specific area by working on a project designed to directly benefit your professional practice. During this virtual PLC, a trained micro-credential facilitator will guide you and a group of fellow educators through the project by providing multiple opportunities for peer feedback during weekly virtual support meetings. PLCs will start the week of February 7, 2021, and end by March 18 on the weekday evening indicated for 30-60 minutes. **Please review a micro-credential's entire rubric - click title below - before registering.**
